OCTOBER 2008

Manufacturing Risks - Pollution Package Policy

ACE Westchester's Environmental Division Expands Appetite for Manufacturing Risks on its Combined General Liability/Environmental Policies

ACE Westchester's Environmental Division has announced the expansion of the preferred risks eligible for its Manufacturers Pollution Package Policy (MPP). ACE Westchester's Environmental Division, a proven leader in environmental and casualty combination policies, has offered their MPP since 2005 to address the liability exposures of the manufacturing industry.

Coverage includes:

- General Liability
- Products Pollution Liability
- Contractors Pollution Liability and
- Onsite/Third Party Site Pollution coverage

Available options include Professional Liability for systems design, as well as separate policies covering Business Auto and/or Follow-form Excess Liability.

Preferred Risks for the Manufacturers Pollution Package Policy include:

- Products that carry, contain, measure, move or otherwise process pollutants such as:
 - Drums, Tanks, Pipes, Tubing
 - Pumps, Valves, Compressors or Other Machinery or Equipment
- Instruments or Gauges
- Non-Mechanical Products (such as sorbent materials)
- Certain types of Chemicals or Batch goods
- Environmental Monitoring and Remediation Systems
- Alternative Energy and Clean Fuel Technologies

Contact your underwriter regarding additional risks that are eligible for consideration.

"Our underwriters have the experience and the environmental and insurance knowledge that is necessary to create the appropriate combination of coverages for your customer," said Barbara Deas, SVP, ACE Westchester's Environmental Division.

The continued growth in the eligibility for this packaged format creates greater choices for your customer, allows ACE Westchester's Environmental Division to provide one-stop service, and reduces potential coverage gaps or overlaps that may exist when numerous policies attempt to provide similar coverage.

Minimum premiums: begin at \$10,000.
