## ACE Westchester Can Help You Be Prepared for Infrastructure Revitalization

As a new administration prepares to revitalize the infrastructure of the United States, we can help you be prepared. As a major provider of Inland Marine products, ACE Westchester offers you Engineered Risk products for the following:

- Bridges
- Tunnels
- Subways
- Dams
- Water and wastewater pipelines
- Wastewater Treatment plants
- Petroleum pipelines
- Storm drainage systems
- Roadways including toll roads
- Light rail and full rail

On some risks, we will consider coverage on the permanent or completed work as well.

### Focusing on Engineered Risks

We recognize that there are many special needs for this particular class of business - from soft costs on a builder's risk job to loss of income for a completed toll road. We have our own policy forms and the ability to participate using other carriers' forms. Our underwriting appetite is flexible and geared towards insurance products that are mutually beneficial.

Whether your projects are existing ones or under construction, we have the experience, capacity and the appetite to be a major factor in insuring your risk.

### The ACE Westchester Advantage

- We have sufficient capacity to handle many risks on our own.
- We have the ability to participate on a quota share or excess basis.
- We understand engineered risks.
- We can offer you an array of products for the coverages you need.
- And, we have the financial backing of the ACE Group of Companies: ACE is consistently rated A+ (Superior) by A.M. Best Company and A+ (Strong) by Standard & Poor's (ratings as of January 1, 2009).

Being able to quote, negotiate and bind an account represents only part of the picture. ACE Westchester Inland Marine has significant experience in all aspects of infrastructure underwriting:

- We have expert claim handlers who help ensure your projects continue or insureds return back to their normal routines.

- We have an outstanding ability to provide Loss Control services for this particular class of business.
- Our average loss control representative has more than 35 years of experience in providing loss control services for Engineered Risks.

When it comes to the insurance needs of infrastructures, ACE Westchester Inland Marine is ready to help you.
